

HARRY XINGSHENG WU

Visual & Experience Designer | UI/UX, Motion, AI-assisted Creative Systems

LA, CA | 626-242-2448 | Landowanderer.com | Harry.wu313@gmail.com

WORK EXPERIENCE

Chongqing Sangtiti Catering Management Chongqing, China

Visual Designer May 2023 – Jun 2024

Led visual direction for digital campaigns and branded electronic music events, creating posters, motion graphics, UI assets, and short-form promotional content across WeChat, Xiaohongshu, and offline activations.

Produced 30+ marketing assets, including AI-assisted visual compositions, event visuals, product photography, and edited videos to support social media promotion and on-site brand presence.

Collaborated with lead architect and production teams on spatial branding, material selection, vendor communication, and on-site execution.

Beijing Sunsea Parking Management Beijing, China

Graphic Design Intern May 2021 – Aug 2021

Designed brand materials, brochures, internal graphics, digital assets, and event visuals across multiple departments.

Created logos and visual directions for annual corporate events, supporting a more consistent internal identity system.

Produced photo and video assets for marketing and internal communication while coordinating with a 5-person cross-regional team.

SELECTED WORK

Field Brief — Apple Maps Concept Study Los Angeles, CA

Product / UI / Motion Design June 2026

Designed an AI-assisted outdoor preparation layer for Apple Maps, translating weather, terrain, facilities, rules, and emergency information into prioritized pre-trip decisions.

Built information architecture, multi-level interaction flows, high-fidelity UI screens, icon systems, motion prototypes, and a product video to communicate the end-to-end experience.

Used secondary research, survey findings, and field observations to define preparation pain points and turn scattered map information into clear action priorities.

Printed Matter — ArtCenter Grad Press Pasadena, CA

Independent Publisher May 2026

Exhibited and sold self-published print works based on thesis research, translating AI-generated moving-image studies into prints, hand-bound books, brochures, zines, stickers, posters, and book objects.

Designed and produced 15+ copies of each publication object, managing layout, printing, binding, material preparation, booth display, and direct sales.
