

HARRY WU

UX / Product Designer

Los Angeles, CA | Open to relocation

626-242-2448 | Harry.wu313@gmail.com | Portfolio: landowanderer.com

SUMMARY

AI product and UX designer based in Los Angeles. I turn ambiguous AI briefs into context-aware product experiences — from user research and conversational UX to shipped, build-ready prototypes. A background in brand and motion keeps experiences cohesive across screens, campaigns, and physical space.

WORK EXPERIENCE

VortexNet | Client: LiveLarge

UX / Product Designer | Los Angeles, CA | May – Sep 2026

- Led research with 18 screened ADU decision-makers (surveys, semi-structured interviews, task-based usability testing); identified two core user types — investment-driven vs. family-driven homeowners — and 4 key issues, reframing the assistant from a Q&A chatbot into a context-aware decision-support experience.
- Redesigning recommendations to explain the “why” behind each match (user priorities, trade-offs, next steps); introduced page-aware context and adaptive comparison states so users keep context while comparing 3 ADU models side by side.
- Designed a consent-based specialist handoff: the assistant generates an editable summary that users review before sharing, addressing continuity and privacy concerns.
- Iterated to v12 across 6 PM review rounds; design adopted and now in development.

Chongqing Sangtiti Catering Management

Visual & UI Designer | Chongqing, China | May 2023 – Jun 2024

- Designed a WeChat Mini Program prototype, defining user flows, information architecture, and a reusable UI asset library.
- Expanded the Anaago brand across campaigns, social channels, and physical spaces, producing photography, video, and motion through AI-assisted workflows.
- Partnered with the art director and production teams to carry the brand into spatial graphics, materials, and on-site execution.

Beijing Sunsea Parking Management

Graphic Design Intern | Beijing, China | May – Aug 2021

- Set the visual direction for annual events, delivering brochures, logos, and digital graphics for departmental communications.
- Produced photo and video content and coordinated delivery across a five-person, cross-regional team.

SELECTED WORK

Field Brief | Apple Maps Redesign

Product / UX Designer | Self-initiated | Mar – May 2026

- Synthesized outdoor-planning research and benchmarked competing map and trail apps to define prioritized pre-trip guidance inside Apple Maps.
- Developed information architecture and high-fidelity UI with an SF Symbols-based icon system aligned with Apple platform conventions.
- Delivered a motion prototype and product film to communicate the feature’s value to stakeholders.

ZNTR | Brand & Web Experience

Brand / Web / Motion / AI Visual Design | Apr – Jun 2025

- Created a modular identity and web experience for a sports-culture archive, combining indexed editorial layouts, expressive typography, motion, and AI-generated imagery.

EDUCATION

ArtCenter College of Design — *MFA, Media Design Practices, 2024–2026 | GPA: 3.88*

California College of the Arts — *BFA, Graphic Design, 2019–2022*

SKILLS

Product & UX: Research synthesis, competitive analysis, user flows, information architecture, interaction design, responsive UI, prototyping, AI interaction design

Visual & Motion: Visual systems, brand design, editorial design, motion design, video editing, AI-assisted visual production Tools: Figma, Photoshop, Illustrator, InDesign, After Effects, Premiere Pro, HTML/CSS, p5.js, TouchDesigner, Codex
